

Robust Implicit-Explicit Time Stepping

Emil M. Constantinescu, Jed Brown, Barry Smith,
Lois Curfman McInnes, Debojyoti Ghosh, and Satish Balay

Time-stepping for ODEs, PDEs, DAEs: $y'(t) = F(t, y(t))$

Present robust [implicit and/or explicit] algorithms with [error control], [step predictors], and prescribed [linear] and [nonlinear stability] properties
